

RC DRILLING TENDER

Legacy Iron is seeking quotes to conduct a RC drilling programme in its Mt Celia Project during the month of March 2018.

Details of the program are as below:

Mt. Celia Project Location – Approx. 200km NE of Kalgoorlie, 100km S of Laverton, near Second Fortune mine.

Program – 1,500 to 2,000m RC in 20-25 inclined (60⁰) drill holes. Most of the holes have planned depth of less than 150m but at cases a few may go up to 200 m deep.

Geology - Normal Eastern Goldfields weathering profile. Mixed basalt, sediments, granite sequence.

Preferably, the cost for drilling may be quoted on per meter basis including all expenses. In addition to the drilling, cost towards downhole directional survey may also be brought out.

All the interested parties are requested to contact info@legacyiron.com.au to get more details about the work (if required) or provide quotes by 3rd March 2018. The interested party must have a proven track record and capability of safely completing the drilling activity.
